

SPECTIS MOULDERS

Textured Products

This has been a year of renovations as our travels have been restricted. Renovations bring a sense of renewal and renewal is always welcome.

WOOD GRAINS

What looks like **oak woodgrain**, stains to look like wood but is light and easy to install? BL 3164WG, page 72—one of our many textured blocks.

Other 'wood-like' textures we make are **weathered cedar**, which highlights a deeper grain, **rough sawn** and **pecky cypress** textures. All of these textures can be seen on page 253 of our catalogue.

STONE TEXTURES

How about **stucco** or **concrete** texture?

Fossil stone, stucco stone or concrete texture are popular for balusters, railings, newel posts and columns.

If you see a standard item that your customer would like in a texture, it will require a custom quote since we cannot simply use an existing mould, but like always, contact us for a quote!

As this interesting year of 2020 draws to a close, we, at **Spectis**, wish **you peace and hope!** **Happy Holidays!**

Contact us for all your customization requests at 1-800-685-9981.

Follow us on Facebook and Instagram for pictures, information and projects.
